

Computable Publishing®: Evidence Viewer

Computable Publishing®: Evidence Viewer displays an Evidence Resource in human-readable form.

The online tool is available on the FEvIR Platform (example viewable at <https://fevir.net/resources/Evidence/7637>) - and is one of several Builder Tools and Viewer Tools. The FEvIR Platform provides access to an array of tools which enable creating and viewing scientific knowledge in standard-based, machine-interpretable units called Resources. Most Resources use the HL7® FHIR® standard specification. Builder Tools enable creation of a FHIR® Resource without any working knowledge of FHIR® or JSON. Viewer Tools enable human-friendly viewing of a FHIR® Resource. Views may include outline representation of the JSON and/or specialized views based on the resource type.

[Computable Publishing®: Evidence Viewer](#) version 0.19.0 (January 3, 2022) features include:

View extensive Evidence data in easy-to-navigate form

- Summary section provides plain text description, assertion, and data source
- Population, Exposures, and Outcomes sections provide user-friendly views of the evidence variables
- Statistics section shows all the statistics in structured form
- Certainty section displays any ratings or comments regarding quality of the evidence

Easily navigate to linked Resources

- Population, Exposures, and Outcomes sections may reference Group and EvidenceVariable Resources
- One-click links will go to Group Viewer and EvidenceVariable Viewer

Warning: Not always relevant

- Some users have stated, "Don't confuse me with the facts. My mind is made up."

See [Computable Publishing®: Evidence Viewer](#) version 0.19.0 (January 3, 2022) for latest release notes.

The FEvIR Platform uses the HL7® FHIR® standard ([current build](#)). HL7®, and FHIR® are the registered trademarks of Health Level Seven International and their use of these trademarks does not constitute an endorsement by HL7.
