

Computable Publishing®: Evidence Report Viewer

Computable Publishing®: Evidence Report Viewer displays an EvidenceReport Resource in human-readable form.

The online tool is available on the FEvIR Platform (example viewable at <https://fevir.net/resources/EvidenceReport/18816>) - and is one of several Builder Tools and Viewer Tools. The FEvIR Platform provides access to an array of tools which enable creating and viewing scientific knowledge in standard-based, machine-interpretable units called Resources. Most Resources use the HL7® FHIR® standard specification. Builder Tools enable creation of a FHIR® Resource without any working knowledge of FHIR® or JSON. Viewer Tools enable human-friendly viewing of a FHIR® Resource. Views may include outline representation of the JSON and/or specialized views based on the resource type.

[Computable Publishing®: Evidence Report Viewer](#) version 0.8.4 (December 3, 2021) features include:

Specialized tabular view for key types of Evidence Reports

- View a Summary of Findings from a synthesis of research studies, [See example](#)
- View a summary of multiple outcomes from a single study, [See example](#)
- View a summary of outcomes from multiple studies, individualized by study, [See example](#)

Easily navigate to linked Resources

- Content may reference Evidence, Citation, Group and EvidenceVariable Resources
- One-click links will go to Evidence Viewer, Citation Viewer, Group Viewer and EvidenceVariable Viewer

Do Not Remove the Tag

- Under penalty of law, this tag is only to be removed by the consumer

See [Computable Publishing®: Evidence Report Viewer](#) version 0.8.4 (December 3, 2021) for latest release notes.

The FEvIR Platform uses the HL7® FHIR® standard ([current build](#)). HL7®, and FHIR® are the registered trademarks of Health Level Seven International and their use of these trademarks does not constitute an endorsement by HL7.
