

Computable Publishing®: Resource Viewer

Computable Publishing®: Resource Viewer displays a Text View of JSON in outline form without the JSON format for any Resource on the FEvIR Platform without a specialized Viewer.

The online tool is available on the FEvIR Platform (example viewable at <https://fevir.net/resources/ActivityDefinition/213>) - and is one of several Builder Tools and Viewer Tools. The FEvIR Platform provides access to an array of tools which enable creating and viewing scientific knowledge in standard-based, machine-interpretable units called Resources. Most Resources use the HL7® FHIR® standard specification. Builder Tools enable creation of a FHIR® Resource without any working knowledge of FHIR® or JSON. Viewer Tools enable human-friendly viewing of a FHIR® Resource. Views may include outline representation of the JSON and/or specialized views based on the resource type.

[Computable Publishing®: Resource Viewer](#) version 0.3.12 (December 23, 2021) features include:

View the JSON in outline form

- View the Resource in Text View or JSON View
- The Text View shows the JSON without [,], {, }, ,, and “ symbols
- Element names are bolded, and data values are not.
- Contained elements are indented.
- Arrays (multiple-instance elements) have each instance numbered.

Clone a Resource

- From the JSON View, create a copy of any Resource that you can edit.

Guaranteed not to turn pink in the can

- Warranty voided if you place it in a can.

See [Computable Publishing®: Resource Viewer](#) version 0.3.12 (December 23, 2021) for latest release notes.

The FEvIR Platform uses the HL7® FHIR® standard ([current build](#)). HL7®, and FHIR® are the registered trademarks of Health Level Seven International and their use of these trademarks does not constitute an endorsement by HL7.
